Iacopo Libero Bernabei

PROFESSIONAL PROFILE

IT specialist with cross-functional skills in software development, cybersecurity, and IT systems management. Practical experience with programming languages (JS, HTML5, PHP, CSS, Java, SQL) and automation tools.

Versatile profile with strong focus on IT security and interest in developing innovative and secure technological solutions, with particular attention to data protection and network infrastructure security.

Currently completing an IFTS specialization as "Network Security and Data Protection Manager", acquiring advanced skills in cybersecurity, ethical hacking, cryptography, network security, IT incident management and data protection compliance.

TECHNICAL SKILLS

- |                                                                           |                                                                     |
|---------------------------------------------------------------------------|---------------------------------------------------------------------|
| • Java, C++ (Basic - academic)                                            | • IT security (Intermediate)                                        |
| • Web development (HTML, CSS, JS, PHP, SQL) (Intermediate)                | • Cryptography and secure data exchange (Basic)                     |
| • Database design (Intermediate)                                          | • Ethical hacking (Basic)                                           |
| • Client-server application development (Intermediate)                    | • Blockchain (Theoretical knowledge)                                |
| • API development (Basic)                                                 | • AWS Cloud (Basic)                                                 |
| • Bootstrap framework (Intermediate)                                      | • IT forensic analysis (Theoretical knowledge)                      |
| • Network infrastructure design (Intermediate)                            | • IT risk analysis and assessment (Intermediate)                    |
| • Linux and Windows operating systems knowledge (Intermediate - Advanced) | • Security incident management (Basic)                              |
| • IT skills (Advanced)                                                    | • Automation with Ansible and Terraform (Basic - Intermediate)      |
| • ACL design (Basic)                                                      | • Kubernetes fundamental concepts knowledge (Theoretical knowledge) |
| • Git usage and versioning best practices (Intermediate)                  |                                                                     |

EDUCATION

Network Security and Data Protection Manager

IFTS: Prato, 09/2024 - ongoing

IFTS Cyber Security Specialist 3

Higher Technical Specialization Certificate and Professional Qualification of Tuscany Region (IV European level)

Diploma: IT Specialist

ITIS Antonio Meucci - Florence, 09/2021 - 07/2024

WORK EXPERIENCE

Internship at Neboola S.R.L.

Florence, 05/2025 - 07/2025

I've done an internship at Neboola S.R.L., where I am applying my skills in cloud infrastructure and cybersecurity to real-world projects. Gained hands-on experience with infrastructure as code using Terraform, automated configuration management with Ansible, and container orchestration fundamentals with Kubernetes.

Freelance Web Developer

Florence, 09/2024 - ongoing

Self-employed - Florence, 09/2024 - ongoing
